PROFESSIONAL SUMMARY

Information Technology (Computer Networking) graduate with hands-on experience in network security, Windows Server 2025 and Microsoft Azure. A problem-solver with a strong work ethic and a collaborative mindset.

SKILLS

Software Development & Web Technologies:

- C#, Python, Java, ASP.NET Core MVC, Entity Framework Core, Razor Pages & Blazor, Dependency Injection, REST API integration

System Administration:

- Windows Server Administration, Linux System Operations, Active Directory Fundamentals

Networking & Infrastructure:

- Switching, Routing, DHCP & DNS services, VLANs, TCP/IP, remote access, DMZ design, NAT & Firewall configuration

Cybersecurity:

- Bash Scripting, Digital Forensics, Incident Response, Malware Analysis, Cryptography, Threat Analysis

Soft Skills:

-Critical thinking, Problem Solving, Teamwork, Customer Service

EXPERIENCE

IT STUDENT ASSISTANT

FEB 2024 – NOV 2024

Central University of Technology, Bloemfontein

- Performed workstation readiness checks and basic IT troubleshooting to ensure uninterrupted lab sessions.
- Organized administrative data using Microsoft Excel to streamline department workflows.
- Provided support to over with assignments and projects by explaining the problem-solving methods.

EDUCATION

ADVANCED DIPLOMA IN COMPUTER NETWORKING

DEC 2025

Central University of Technology, Bloemfontein

- Completed relevant coursework in Research, Information security and obtained an average of 73%.

DIPLOMA IN COMPUTER NETWORKING

DEC 2024

Central University of Technology, Bloemfontein

- Completed relevant coursework in CCNA, CCNP, software development and software engineering.

NATIONAL SENIOR CERTIFICATE

NOV 2019

Queens High School, Johannesburg

CERTIFICATIONS

- Robot Operating System (ROS 2) - FH AACHEN
- Microsoft Azure Fundamentals AZ-900 – Microsoft
- IT Essentials – Cisco

JAN 2025

OCT 2024

AUG 2022

ACHIEVEMENTS & COMPETITIONS

3rd place SANReN Cyber Security Challenge 2025 ([Link](#))

Outperformed 240 teams and was awarded 3rd place nationally as part of Team NOTOR10S demonstrating advanced skills in Network Security, CTF Challenges and real time Attack and Defense scenarios.

PAICTA Cyber Security Challenge 1st Runner- Up

I implemented my skills in cybersecurity to qualify for the Pan African Information Communication Technology Association Challenge finals and Ranked 2nd place in the SADC region.

Cyber 9/12 Strategy Challenge

Developed clear, concise cyber incident policy and response documentation under time constraints. Evaluated legal, regulatory, and operational considerations in cybersecurity decision-making. Ranked 5th place.

TECHNICAL PROJECTS

All projects can be found on my GitHub: <https://github.com/tumellop>

ASP.NET CORE STUDENT MANAGEMENT SYSTEM

- Designed and developed a secure, multi-layered web application using ASP.NET Core MVC and Onion Architecture.
- Implemented authentication and authorization using ASP.NET Identity to enforce role-based access control.
- Integrated RESTful Web APIs and Entity Framework Core with code-first migrations for dynamic database management.

ENTERPRISE NETWORK INFRASTRUCTURE DESIGN (EVE-NG)

- Designed and implemented a fault-tolerant enterprise network architecture simulating real-world production environments.
- Configured dynamic routing protocols including BGP, OSPF, and EIGRP to support redundancy, traffic optimization, and failover.
- Implemented redundancy and security controls to simulate production-grade traffic and high availability.

PORTFOLIO WEBSITE

- Built a high-performance static portfolio website using Hugo to document networking and cybersecurity projects.
- Implemented automated CI/CD pipelines using GitHub Actions to enable continuous deployment.
- Deployed and maintained the site using cloud-based hosting and automated workflows.
